Traffic Crash Statistics**

A MESSAGE FROM THE COMMISSIONER OF THE NORTH CAROLINA DIVISION OF MOTOR VEHICLES

The mission of the North Carolina Division of Motor Vehicles is to deliver quality driver and motor vehicle services, promote highway safety and furnish timely and accurate information. We accomplish these goals by providing stellar customer service, enforcing motor vehicle laws and maintaining the integrity of official DMV records.

This Division and its many partners continue to make strides in promoting safety. We encourage drivers to change their habits and assist with the national goal of reducing motor vehicle crashes and the severity of injuries on our state highways. However, many drivers still create dangers by ignoring the rules of the road.

In 2014, reportable traffic crashes increased by 2.9 percent. The number of fatalities also increased by 1.3 percent compared to those in 2013. There was a decrease of 2.0 percent in the number of motorcyclists killed and the number of pedal-cyclists killed (10.5 percent). The number of pedestrians killed in motor vehicle crashes also decreased by 1.2 percent. Fortunately, the number of motor vehicle crashes involving a teen driver decreased by 1.7 percent. Crashes involving teen drivers that were speeding also decreased by 1.8 percent.

As you use these statistics, it is the Division's sincere wish that you become an active participant in making our highways safer by educating yourself about the disastrous consequences of motor vehicle crashes. Spread the word to all you know. Thank you for your help in making North Carolina a safer place to drive, bicycle and walk.

DRIVER DISTRACTION

The National Highway Traffic Safety Administration (NHTSA) defines distracted driving as any non-driving activity a person engages in while operating a motor vehicle. Such activities have the potential to distract the person from the primary task of driving and increase the risk of crashing (<http://www.nhtsa.gov/Research>).

Driver Distraction is a self-reporting contributing circumstance. Therefore, the data collected may not reflect the severity of this issue. In 2014, 21.7% of the crashes in North Carolina involved a driver that was distracted.

Based on reportable crashes only, and includes vehicle types passenger car, pickup, light truck, sport utility, and van. Cases where extent of injury or belt usage is unknown or unable to be determined are excluded. "Belt" includes these categories: lap belt, lap and shoulder belt, shoulder belt, and child restraint. Information includes data for the period January 1 through December 31, 2014.

This ranking of cities is based on several factors including reported crashes, crash severity, crash rates, and populations. For a complete listing of factors and data, contact Brad Robinson, PE with the Traffic Safety Systems Management Unit in the Department of Transportation.

Note: In 2013 VMT (Vehicle Miles of Travel) data for larger cities became available, therefore crash rate calculations based on this data have now become a part of the rankings process for cities with populations greater than 10,000. As a result, some city rankings were more affected by this change than others.
